PROFILE

First-year B.Tech student in Artificial Intelligence & Data Science at Easwari Engineering College. Focused on technical problem-solving with a certified foundation in Data Structures (C) and Python scripting. Experienced in collaborative development through hackathons, contributing as both a Frontend Developer and Primary Presenter.

HIGHLIGHTED PROJECTS

PawGuard

Developed an AI-powered stray animal welfare advisor featuring emergency first-aid guides and an NGO rescue directory for a sustainability internship.

Key: Integrated a Retrieval-Augmented Generation (RAG) system and OpenRouter API within a React and Tailwind CSS interface.

DAIS (Event Management System)

Engineered a comprehensive university event management platform developed specifically for a professor to streamline and track campus activities.

Key: Collaborated in a 6-person team to design and implement the system's core architecture and features.

AuraAudit

Designed and developed the frontend UI prototype for an advanced, AI-powered web auditing tool.

Key: Built a responsive, modern interface utilizing React, TypeScript, and Tailwind CSS.

Lettering Gallery & Technical Portfolio

Built a personal portfolio website to showcase software engineering projects alongside custom Gothic and Blackletter calligraphy artwork.

Key: Developed a responsive frontend architecture using React and Tailwind CSS.

EDUCATION

B.Tech in Artificial Intelligence & Data Science

2025 - 2029

Easwari Engineering College , Chennai

SKILLS

- Languages: Python, C
- Web Technologies: HTML5, CSS3
- Libraries & Frameworks: Pandas, NumPy, Matplotlib, Streamlit
- Core Concepts: Data Analysis & Visualization
- Design: Product Poster Design

TOOLS

Git , GitHub, Jupyter Notebooks, Kaggle, VS Code, Vercel
